MISSISSIPPI STATE DEPARTMENT OF HEALTH BUREAU OF PUBLIC WATER SUPPLY CCR CERTIFICATION CALENDAR YEAR 2013 TOWN OF TERM

List PWS ID #s for all Community Water Systems i	included in this CCR
The Federal Safe Drinking Water Act (SDWA) requires each Community p Consumer Confidence Report (CCR) to its customers each year. Depending system, this CCR must be mailed or delivered to the customers, published in a recustomers upon request. Make sure you follow the proper procedures when email a copy of the CCR and Certification to MSDH. Please check all boxes.	
Customers were informed of availability of CCR by: (Attach copy	of publication, water bill or other)
Advertisement in local paper (attach copy of adve On water bills (attach copy of bill) Email message (MUST Email the message to the Other	address below)
Date(s) customers were informed:/,/	, / /
CCR was distributed by U.S. Postal Service or other direct de methods used	
Date Mailed/Distributed://	
CCR was distributed by Email (MUST Email MSDH a copy) As a URL (Provide URL As an attachment As text within the body of the email message	Date Emailed: / /
CCR was published in local newspaper. (Attach copy of published	CCR or proof of publication)
Name of Newspaper: Byram Barron Date Published: JUNE / 2014	
Date Published: JUNE 12014	
CCR was posted in public places. (Attach list of locations)	Date Posted: MU/29/2014
CCR was posted on a publicly accessible internet site at the following	ng address (DIRECT URL REQUIRED):
WWW. TERRY MS. ONG	
CERTIFICATION I hereby certify that the 2013 Consumer Confidence Report (CCR) ha public water system in the form and manner identified above and that the SDWA. I further certify that the information included in this CCF the water quality monitoring data provided to the public water sy Department of Health, Bureau of Public Water Supply.	at I used distribution methods allowed by is true and correct and is consistent with
Name/Title (President, Mayor, Owner, etc.)	5/29/14 Date
Deliver or send via U.S. Postal Service: Bureau of Public Water Supply P.O. Box 1700 Ma (60)	y be faxed to: 1)576-7800 y be emailed to:

May be emailed to: <u>Melanie.Yanklowski@msdh.state.ms.us</u>

CALENDAR YEAR 2013 CONSUMER CONFIDENCE REPORT TO THE ALK SUPPLES

CERTIFICATION REPORT TOWN OF TERRY

2014 JUN 10 AM 9: 12

PWS ID # ('s): 0250025

The Federal Safe Drinking Water Act requires each *community* public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed to the customers, published in a newspaper of local circulation, or provided to the customers upon request.

Please	Answer the Following Questions Regarding the Consumer Confidence Report
	Customers were informed of availability of CCR by: (Attach copy of publication, water bill, or other) Advertisement in local paper June On water bills may Other On Wille May
	Date customers were informed: May + June
	CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:
<i>(</i>	Date mailed/distributed:
5	CCR was published in local newspaper. (Attach copy of published CCR and proof of publication) Name of Newspaper: Dynam Danner Date Published: 2014
	CCR was posted in public places. (Attach list of locations)
	Date posted: Public Works (Wolunept.) City Hall, Kilrary May 2014 CCR was posted on a publicly accessible internet site at the address: www: Terry MS. ORA May 2014
	CCR was posted on a publicly accessible internet site at the address: www: Terry ms. ORa May 2014
	IFICATION:
system correct	y certify that a Consumer Confidence Report (CCR) has been distributed to the customers of this public water in the form and manner identified above. I further certify that the information included in this CCR is true and and is consistent with the water quality monitoring data provided to the public water system officials by the ippi State Department of Health, Bureau of Public Water Supply.
(Ku	revide J. Nedol 5/29/14
Name/Title	e (President, Mayer, Owner, etc.) Date
This Co	onsumer Confidence Report (CCR) was completed by MS Cross Connection, LLC with information provided by ve Public Water System and is certified only to be as true & correct as the information provided.
Signature	san Boyette 5-12-14 Date

Mail completed form along with a copy of your CCR Report(s) before JULY 1, 2014 to:

MS State Department of Health Division of Public Water Supply P O Box 1700 Jackson, MS 39215 Phone: 601-576-7518

LULLE - WATER SUPPL

Annual Drinking Water Quality Report 2014 JUN 10 AM 9: 13 Town of Terry PWS ID # 0250025 Mav. 2014

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source consists of two wells that draw from the Forest Hill Aquifer.

A source water assessment has been completed for the water supply to determine the overall susceptibility of its drinking water to identify potential sources of contamination.. The water supply for the Town of Terry received a low susceptibility ranking to contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Sylvia McDavid at 601-878-5557. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Tuesday of each month at Terry Town Hall at 315 E Cunningham at 7:00 p.m.

The Town of Terry routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2013. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

3				TEST RI	ESULTS			
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Inorganic (Contami	nants			· l 	<u></u>	L	
10. Barium	N	2012*	0.00404	No Range	Ppm	2	2	Discharge of drilling wastes; discharge from metal refineries;
14. Copper	N	1/1/09 to 13/31/11*	0.1	None	ppm	1.3	AL=1.3	erosion of natural deposits Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
16. Fluoride	N	2012*	0.204	No Range	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	1/1/09 to 12/31/11*	3	None	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposit
Disin fectan	ts & Dis	infectant	By-Proc	lucts				
Chlorine (as Cl2)	N	1/1/13 to 12/31/13	0.80	0.30 to 1.20	ppm	4	4	Water additive used to control microbes
73. TTHM [Total tri- halomethanes]	N	2011*	16.57		ppb	0	80	By-product of drinking water chlorination
HAA5 Most recent samp	N	2011*	12	None	ppb	0	60	By-product of drinking water chlorination

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Town of Terry is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may which to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601.576.7582 if you wish to have your water tested ..

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

This report being published in the paper will not be mailed. If you have any questions or would like a copy please

Annual Drinking Water Quality Report Town of Terry PWS ID # 0250025 May, 2014

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source consists of two wells that draw from the Forest Hill Aquifer.

A source water assessment has been completed for the water supply to determine the overall susceptibility of its drinking water to identify potential sources of contamination. The water supply for the Town of Terry received a low susceptibility ranking to contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Sylvia McDavid at 601-878-5557. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Tuesday of each month at Terry Town Hall at 315 E Cunningham at 7:00 p.m.

The Town of Terry routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2013. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances.
